# Summary of Voxel X

**Voxel X Network ('Voxel X')** is a community established ecosystem that believes DeFi is a vital resource to the Web3 economy in acquiring generational wealth distribution through collaboration and commerce in creating the largest free decentralized market the world has ever seen.

Voxel X ecosystem offers a solution based approach by creating synergy between the **gaming industry** and **blockchain technology**.

Voxel X developing infrastructure within its ecosystem will provide innovative next generation technological solutions for the emerging NFT, GameFi and Metaverse industry, which will include the Voxel X Powered NFT Marketplace **Superkluster**, **VoxDEX** Decentralized Exchange, **VoxelXVerse** Metaverse, **VoxNodes** Node Network and **VoxDAO** DAO system.

Voxel X is optimized for NFT digital assets, gaming, metaverse, and Web3 development, while supporting key EVM chains.

# Token Utility

**\$VXL is a deflationary token on the ERC-20 smart contract using the most current version of Solidity.**

**\$VXL will function as the utility token for the entire Voxel X Network ecosystem; \$VXL will be used as the native currency for SuperKluster NFT Marketplace, VoxDEX Exchange staking for passive returns, Voxel X Node Network, and VoxelXVerse Metaverse.**

With a 500 million token supply, a portion allocated towards decentralized & centralized exchanges, and the remaining allocated across Voxel X platforms ie SuperKluster NFT marketplace, VoxDEX VoxNodes and VoxelXVerse Metaverse, it is fair to say \$VXL stand-alone utility token offers exponential value to its community.

# Foreword

**At the start of 2021, there were approx. 100 million crypto users, and by the beginning of 2022, well over 300+ million crypto users.**

**Over 4.6 billion people have access to the internet today, and with advances in low orbit satellite technologies; that number is set to increase dramatically over the next 2 years.**

**Based on steady adoption rates, prevailing technological advances and the global economic and financial state of the world, it is clear we are moving into an exponential growth period. It is expected that there will be more than 1 billion crypto users by 2024 and over 4.3 billion by 2030.**

In addition to cryptocurrency adoption, there is an estimated 2.69 billion online gamers worldwide. Although at this time the gaming industry is primarily centralized, there is a growing positive collective consciousness towards the benefits of blockchain gaming in web3, that will inevitably benefit the end users experience by improving security, functionality and in the creation of new revenue streams.

With an ever-growing shift towards Play-To-Earn (P2E) gaming, 2022 is expected to be the year of GameFi & metaverse mass adoption.

Voxel X was born out of this inevitable shift, a group of entrepreneurs, Defi enthusiasts, and blockchain experts envisioned a decentralized, community-driven GameFi & Metaverse ecosystem that could facilitate this growing trend by providing decentralized solutions, platforms, and services to aid in the experience and quality development of the emerging web3 digital economy.

# Legal

Voxel X legal representatives are the reputable law firm Jacque Law LLC based out of Singapore.

Voxel X comprehensive legal opinion was formalised by Jacque Law LLC.

Voxel X Network Inc was incorporated as a company in Panama as of April 2022.

# Security

**Voxel X Network takes the security of its community of utmost importance, and thus all smart contracts and platforms within the Voxel X ecosystem, have and will continue to be audited by the premier security auditors CertiK.**

\$VXL Smart Contract was audited by CertiK in March 2022 and has consistently retained a live score at 90 or above on CertiK Skynet, which you can also review on CertiK audit report online.

VXL Powered NFT Marketplace SuperKluster was audited by CertiK in July 2022 and obtained exceptional results, which you can review on CertiK website online.

All future platforms within the Voxel X ecosystem will be audited by CertiK and the audit report findings will always be available with its live score on CertiK 24/7 Skynet at: [www.certik.com/projects/voxel-x-network](http://www.certik.com/projects/voxel-x-network)

# Voxel X Ecosystem

Providing innovative next generation technological solutions for the emerging Blockchain GameFi & Metaverse industry

## \$VXL TOKEN

\$VXL will function as the utility token for the entire Voxel X Network ecosystem.

## VOXDEX

A powerful & robust decentralized exchange.

Swap, earn, and build on the leading decentralized crypto trading protocol.

Generous Rewards Incentive System.

## VOXELXVERSE

Building an interconnected Metaverse environment with other partner environments.

Developing and optimizing 3D cross compatible NFT assets.

Play, trade and connect.

## SUPERKLUSTER

A Multi-chain NFT Decentralized Marketplace designed for creators and optimized for GameFi & Metaverse NFT assets.

## VOXNODES

A community-owned, cloud-free solution comprised of thousands of community nodes which will form the Node architecture optimized for GameFi & Metaverse, which will run on an auto-scaling, high-speed, lightweight blockchain.

## VOXDAO

Decentralized Autonomous Organisation ('DAO') governance system governed through fair and transparent community proposals and voting mechanisms for decision making.

# SuperKluster

**SuperKluster was under development for over 10 months, which included extensive optimization after rigorous testing and CertiK security audit.**

**SuperKluster is positioned to become the world's #1 decentralized community preferred NFT Marketplace platform.**

**Extensive functionality tailored around the optimization for 3D Model NFT Minting, means we will be one of the only NFT Marketplace platforms with the capabilities to mint 3D models using files such as GLB, GLTF, OBJ and FBX, again this demonstrates why we expect to become leaders within the NFT, GameFi & Metaverse space.**

We are excited to provide our very own User & Collection Verification Feature, this will be an elective and is not mandatory, but will serve as an added certification feature when buying and selling NFTs on SuperKluster.

One of the main objectives at Voxel X has been to develop a decentralized NFT marketplace platform, this has led to the scrutinization of every process, the optimization for automation, with the ultimate goal in working towards becoming a fully functional community driven decentralized platform.

SuperKluster was designed and built to optimize metaverse/blockchain gaming development with creators, collectors, investors and artists in mind. With the persistent support and continued backing from the VoxCitizens and the wider community, "SuperKluster" will become a flagship NFT Marketplace in web3.

We have been working tirelessly to build our panel of projects listed onto Voxel X NFT, GameFi & Metaverse Partnerships and we expect this will provide more volume and activity onto SuperKluster.

# SuperKluster

**VoxCitizens will represent the community driving the Voxel X ecosystem.**

**VoxCitizens are expected to be loyal to the vision of Voxel X in becoming a decentralized community driven project.**

There will only be a max supply of **5,000** VoxCitizens NFTs minted. **1,000** VoxCitizens will be released annually.

All staked VoxCitizens NFTs will be eligible to validate proposals and to participate in the community vote on the VoxDAO, while earning a generous passive income via VoxDEX.

Voxel X Network will contribute an initial 5M \$VXL token allocation towards the \$VXL NFT REWARD SUPPLY POOL, while 50% from all VoxCitizens NFT sales including royalties, will be distributed to the \$VXL NFT REWARD SUPPLY POOL.

Rewards will be paid in \$VXL Tokens from the \$VXL NFT REWARD SUPPLY POOL and the APR is based on the following live formula as follows:

**$$\left( \frac{\$VXL \text{ NFT REWARD SUPPLY POOL}}{(365 \text{ days lapsed from the first day of rewards commencement})} \right) / \text{amount of VoxCitizens NFTs staked} * \text{amount of VoxCitizens NFTs staked}$$**

09

Exchange

# VoxDEX

**Voxel X Powered Decentralized Exchange 'VoxDEX' will serve as the premier destination for swaps, staking and liquidity pools. With advanced features such as limit order, expert mode, a comprehensively developed incentivised reward system and more importantly will be audited by CertiK and live on skynet when launched.**

**Additionally users who supply Liquidity (LP) to the DEX will receive automated distributions of competitive annual rates of return for farming and annual percentage for staking.**

DEXs have been on a rinse and repeat cycle over the past couple of years and have not brought much innovation to Defi.

Here at Voxel X not only will our DEX serve as place for swaps, staking and liquidity pools as the standard factory default as mentioned above, but we have made several key additions to VoxDEX for a far more advanced experience.

VoxDEX is currently working towards delivering its Beta and CertiK Security Audit.

# VoxelXVerse

**The Metaverse is the hypothetical next iteration of the Internet as a single universal, immersive collection of virtual worlds.**

Voxel X aims to take a collaborative approach in development to troubleshoot and evolve with the prevailing technologies and industry conditions to deliver a more comprehensive enjoyable product for the end user.

Voxel X Metaverse aims to enhance social connection, discovery, and experience for individuals and communities of the metaverse with a focus on interplay and synergy between other coextensive development teams within web3.

# VoxNodes

**VoxNodes Node Network will introduce a community-owned, cloud-free solution comprised of thousands of community nodes which will form the Node architecture optimized for GameFi & Metaverse, which will run on an auto-scaling, high-speed, lightweight blockchain.**

VoxNodes will create a use case for **high-volume, high-speed gaming** on devices such as laptops, tablets, and even smartphones, on a **secure** distributed network.

A limited Nodes edition will be made available for Voxel X holders pre launch based on requirements which has been scheduled in Q4 / 2022.

Once integrated, these Nodes will authenticate network transactions, reduce gas fees, reduce energy consumption and provide sustainable passive income streams for projects onboarding, node network owners and project communities.

The Node Network Architecture Development Plan Release has been scheduled in Q4 / 2022.

# VoxDAO

**The VoxDAO exists because decentralized governance is critical to building and managing a globally dispersed community; and therefore critical to the success of the Voxel X Network Ecosystem.**

The VoxDAO Proposal Process will allow Voxel X Network community members to make decisions regarding Ecosystem Fund allocations, governance rules, projects, partnerships, and other decisions for the entire Voxel X Network Ecosystem (SuperKluster, VoxDEX, VoxelXverse or the DAO itself).

VoxDAO aims to improve transparency, integrity, effective performance and collaboration across the entire ecosystem.

All staked VoxCitizens NFTs will be eligible to validate proposals and to participate in the community vote on the VoxDAO, while earning a generous passive income via VoxDEX

While all \$VXL Token holders that have single-sided staked their tokens will be eligible to participate in the community vote, while earning a generous passive income via VoxDEX.

# Revenue Streams

Voxel X is developing infrastructure using \$VXL as a native token to power the entire ecosystem.

With a large number of projects listing onto the Voxel X NFT, GameFi & Metaverse Partnerships program, we expect instant volume and \$ revenue.

# Voxel X NFT, GameFi & Metaverse Partnerships

Voxel X is working to list 100+ multi-chain blockchain projects, which will allow for instant volume and \$ value on all of its platforms within the Voxel X ecosystem.

## Listing Benefits

- Access to Voxel X Powered **SuperKluster NFT Marketplace** 01
- Access to a host of **NFT creators** 02
- Access to **NFT, GameFi & Metaverse Communities** 03
- Extensive **Marketing Exposure** social media & communication platforms ie AMAs 04
- Pathway to **VoxDEX Decentralized Exchange** 05
- Pathway onto **VoxNodes Node Network** 06
- Access to **high level support** from Voxel X Smart Contract to Metaverse Development, Marketing & Operations team 07
- Connectivity of **Project's Metaverse Environments** amongst communities 08

# Voxel X Creative Partnerships

**Voxel X is working to list 1000+ creative partners which provide automatic verified status on Voxel X Powered SuperKluster NFT Marketplace as well as many other advantageous marketing mediums.**

NFTs will transform the rules surrounding ownership, identification and the culture of art. There are a lot of misconceptions surrounding NFTs as art and we are determined to change this. What Voxel X Network and partners are doing is laying the foundations of a hub for artists.

We aim to create a haven for expressionism, experimentation and co-operation. We believe that NFT artwork as a form of expressionism is in its infancy, and it is today's artists as early adopters that have the ability to advance this space and prove these misconceptions to be misguided rather than the entities or decentralized marketplaces.

It is those who create that hold the power, we at Voxel X simply want to provide a platform and haven for this power to create a new culture, a digital renaissance. As a first step we have created a channel focused on artists in our Discord channel. It is a place to share passion and creativity with each other.
